

# Vote for Science

**A quick guide to investigating political parties' science platform during the 2019 Federal election.**

## Climate Science

- What will you do to ensure that Canada's climate scientists receive enough funding to research climate change?
- Will you support a dedicated funding stream for climate science?
- How will you ensure that government decisions are based on the data gathered by climate scientists?

## Making Science Accessible

- How will your government ensure that Canadians have access to science research?
- How will your government make federally funded research available to the public?

## Health Care

- How might Canada's health care system be supported and strengthened?
- What will you do to ensure that Canadians have access to reliable information about evidence-based healthcare?

## Evidence-based decision making

- How will you know that the evidence your decision-making is based on is sound?
- How will you help Canadians to better understand the difference between fact (science) and opinion?

## Science Integrity

- What confidentiality requirements will your party place on Canada's science program?
- How will your party strengthen Canada's recently implemented Science Integrity Policies?

## Canada's Chief Science Advisor

- How will you support the work of Canada's Chief Science Advisor?
- What will your party to support a coordinated national science strategy?

**A healthy democracy is built on good science.**
